Subject: Updated Document with revisions to Chapter 3 (Old ch4)
Attachments: INTRODUCTION TO OLD 4 with materials for ch2 for Grouping.docx; Additivity - Main Text and Appendix A Combined Comments 10-25-17.docx

I am checking the document back in.

Attached for your reading pleasure and discussion on Friday is a revised version of Ch 3. Everything is in Track Changes.

As we discussed last week, I removed the first section of Ch 3 that described the previous considerations (The deleted text is attached). We agreed to incorporate those materials into Ch 2. I have also deleted the first figure in the Chapter as I agree (mainly with jeff's point) that it is distracting and not quite on topic.

I am not sure why the Figures duplicated (it is slightly annoying) and I will get some help to remove them in the future.

There are now 3 Sections:

- 3.1 Environmental Exposures to the Mixture
- 3.2 Similarity of Toxic Action
- 3.3 Uncertainties when using these considerations

Thanks,

Glenn
